

Module 7 Lesson 2 Assignment

Name: _____

For each quadratic equation:

- Complete the square to put the equation in vertex form.
 - Graph the quadratic equation using shifts.
 - State the coordinates of the vertex.
 - Determine whether the vertex is a minimum or a maximum.
 - State the equation for the Axis of Symmetry.
 - Find the coordinates of the roots by graphing. If integral roots cannot be found, estimate the roots by stating the consecutive integers between which the roots lie.
 - State the domain and range of the parabola.
