

For each of the following graphs:

- Label the vertex.
- Draw and label the axis of symmetry.
- Label the x-intercept(s).
- Label the y-intercept.
- State the minimum/maximum value.

1) $y = \frac{1}{2}x^2 - 2x + 5$

3) $y = -x^2 + 2x - 4$

2) $y = -2x^2 - 8x - 5$

4) $y = 2x^2 - 4x$
